# MICHELLS BULBS

HENRY F. MICHELL CO. 518-516 MARKET ST. PHILA., PA.

### NOTICE TO CUSTOMERS OUTSIDE OF THE UNITED STATES

In remitting for purchases at the time of ordering, or when paying accounts, by reason of the Exchange we ask that you please send P. O. Money order in U. S. Funds or a check or draft on a New York or Philadelphia Bank in par U. S. Funds.

#### **BUSINESS TERMS**

We especially invite Charge Accounts which is more convenient than to remit for each order at the time it is sent us. When sending your first charge order, please send us the names and addresses of two or more business houses with whom you have had past or present credit relations.

#### REGARDS C. O. D. SHIPMENTS

Goods can be sent C. O. D. (with the exception of perishable items, which include plants and cold-storage bulbs; these cannot be sent C. O. D.). No C. O. D. shipments for any kind of goods can be made by express or freight out of town unless a partial remittance accompanies the order. No C. O. D. orders can be accepted where the amount is less than \$1.00.

#### SHIPPING INSTRUCTIONS

Always state by what method you want goods forwarded, otherwise we will ship according to our best judgment.

#### PACKING CHARGES

No charge is made for boxes, packing or bags, except for two-bushel seamless sacks, which are returnable for credit at the market price as charged.

#### FCRWARDING SERVICE

We pay postage charges on all orders for vegetable and flower seeds, provided the order calls for packets, ounces, quarter-pounds and pounds (beans, corn, peas and mixed grass seeds, bulbs, plants and sundries are not included). If these are wanted by mail, remit for postage the amount named in connection with the item up to and including the third zone; for other zones add additional postage or at the rate quoted in table below.

All Plants, Roots and Bulbs are forwarded by Express (or Parcel Post when possible) purchaser paying charges, unless otherwise noted.

For those of our customers who prefer to receive such goods by Parcel Post, we will be pleased to forward in this manner such plants as can be sent in this way at the following additional cost, which must be added to the value of each order for Plants, Roots or Bulbs unless otherwise noted.

To all points east of the Mississippi River, 15 per cent. extra to cover postage and packing charges.

To all points west of the Mississippi River, 25 per cent. extra.

SAFE ARRIVAL.—We guarantee the safe arrival of all goods sent to points within the United States except when shipped to points where there is no express or freight agent, to such points the purchaser must assume any claim for loss or damage.

LOCAL DELIVERY.—Our free delivery service covers Philadelphia and vicinity, also Camden, N. J., and nearby points.

Also note that we do not guarantee to maintain a daily delivery to these points. Please note the free delivery service does not include bulky quantities of fertilizers in over 14 ton quantities. Special arrangements can however be made for delivery of these at a reasonable charge.

Shipment of goods can also be made by package service from Market and Chestnut St. Ferries, Broad St. Station, Reading Terminal and B. & O. R. R., at 24th and Chestnut Sts.

The tariff for shipments that can be made by this method on merchandise they will receive packed in one piece is as follows:

10 lbs. and under, 12c. 26 lbs. to 40 lbs., 24c. 11 lbs. to 25 lbs., 18c. 41 lbs. to 50 lbs., 30c.

Shipments weighing more cannot be sent via Package Service.

#### CONDITIONS OF SALES

All contracts, sales and acknowledgments of orders are contingent upon crop failures, our ability to import and make deliveries in conformity with the "Plant Quarantine Act," partial deliveries by growers or manufacturers, strikes, or other unavoidable causes beyond our control, clerical errors included; also unsatisfactory credit standing. All quotations are subject to market changes and goods being unsold on receipt of order. Henry F. Michell Co. give no warranty, expressed or implied, as to the description, purity or productiveness of any seeds, plants or bulbs they send out, and they cannot be in any way responsible for the crop. If the customer does not accept the goods on these terms, he must notify us at once, and we will give instructions for disposition of the goods. No responsible seedsman can give a warranty.

### MICHELL'S BULBS FOR ROCK GARDENS

Lily Elegans

The varieties of bulbs listed below will give a finished touch to the rock garden. They do not require any more treatment than that given other rock plants and their beauty furnishes a contrast that is entirely different. By careful selection in planting they can be had in bloom from early spring until the alpines and other perennial plants commence flowering. They are perfectly hardy, long lived and of easiest culture. For descriptions of the bulbs listed on this page, see pages following, under their respective headings.

Narcissu

#### LILIES

The following varieties have been selected for their adaptability to rock garden culture, producing a beautiful color effect; we suggest that all lilies planted should be given a ground cover of Granulated Peat Moss; this helps to keep the weeds down as well as keeping the surface cool and moist.

# MICHELL'S SUPERB DARWIN TULIPS

Darwin Tulips are ideal for the herbaceous border or massed in clumps in front of shrubbery. As a cut flower for vases they are superior to any other class of tulips. The splendid form, exquisite coloring and the enormous size of numerous varieties make them the favorite of all tulips. They belong to the May-flowering or late blooming class and produce their gigantic flower cups on long, stiff stems, above the broad foliage. They are also splendid for pan or pot culture. As this class is short of yellow, orange, and bronze varieties, these colors may be obtained in the Breeder and May Flowering or Cottage Garden types. The flowers are similar in shape and bloom at the same time as the Darwins. Ideal arrangements and color effects can be obtained by a combination planting as suggested above.

CULTURAL DIRECTIONS.—For Bedding Out. Plant in October or November in good, well-drained garden soil; set the bulbs 5 to 6 inches apart and 4 to 5 inches deep. After the ground has frozen, cover with litter, leaves or manure to protect them from frost; this should be removed in the spring when danger from hard frost is past.

For Pot or Pan Culture.—Plant 4 to 6 bulbs in a 6-inch pot or 6 bulbs in a 6-inch pan, water thoroughly and then remove to the open ground or in a cold frame, covering with coal ashes; after they have rooted thoroughly they should be brought in a moderately cool room and gradually warmer; by bringing in a fresh supply every ten days, they can be had in bloom all winter.

For complete cultural notes, see "Michell's Bulb-Growing Guide," sent free on request.

The asterisk (\*) preceding the variety denotes that it is suitable for forcing as well as bedding. The letters E, F, G and H following the variety indicate their relative time of blooming, the E's being the earliest to bloom. The figures indicate the normal height in inches.

If Tulip Bulbs are wanted by Parcel Post, add 10c. per doz., 25c. per 100, for postage.

#### **BUNCH FLOWERED TULIPS**

Monsieur Mottet. A new and interesting type which has created a sensation at all Flower Shows. It produces four to six flowers on a stem, all in bloom at the same time. Color, white faintly flushed shell-pink as the flower ages. It is an excellent cut flower and should be in every garden. Height, 24 inches. 90c. per doz.; per 100, \$6.50; \$60.00 per 1000.

Your rock garden should contain an assortment of bulbs especially selected for that purpose. See page one of this catalog for a complete list.

#### MICHELL'S BULB GROWING GUIDE

A booklet, containing not only the most up-to-date cultural directions in general, but giving a very concise detail as to what use each variety is best put and in addition describing very explicitly almost every bulb offered in this catalog. Free on request.

**DUTCH BREEDER TULIPS** 

A May-flowering type, similar to the Darwins, in their tall, strong growth and flowering at the same time: they produce immense blooms on long, stiff stens and in some instances are larger than the Darwins. Their artistic colors make them great favorites among those who desire to contrast their bronze, terra-cotta and buff shadings with the lighter colored sorts of the Darwins. They make a fine effect in hardy borders and when used as a cut flower last a long while in water.

Suggestion

As Breeder tulips contain shades that are not to be found in either Darwin or May Flowering or Cottage tulips, a selection made from the above list and planted in combination with the types above mentioned will produce a display of color that cannot be duplicated. Give your garden that finished touch by planting Breeder tulips.

### 6 MICHELL'S MAY-FLOWERING OR COTTAGE TULIPS

Cottage Tulips flower late, most of the varieties can therefore be used in contrast with Darwins and magnificent results obtained. Our list cortains some of the best sorts of the new late flowering hybrid varieties, which are the result of crossing the Darwins with the Cottage. We recommend the varieties listed for planting in hardy flower borders, in clumps or masses.

The asterisk (\*) preceding the variety denotes that it is suitable for forcing as well as bedding. The letters E, F, G and H following the variety indicate their relative time of blooming, the E's being the earliest to bloom. The figures indicate the normal height in

### MICHELL'S SINGLE EARLY TULIPS

Single Early Tulips are far more valuable for the garden than is generally accepted, blooming so much earlier than the Darvins and at a time when Daffodils are at their best. Excellent effects can be produced if used in the border; they are at their best when little else is in bloom. They are the earliest of all Tulips to bloom when forced.

The asterisk (\*) preceding the variety denotes that it is suitable for forcing as well as bedding. The letters A, B and C following the variety indicate their relative earliness to bloom, the A's being the earliest, followed by the B's and later by the C's. The figures indicate the normal height in inches.

### 10 MICHELL'S SUPERB NARCISSUS OR DAFFODILS

#### AMERICAN GROWN

No garden is complete without the Narcissus or Daffodil, being among the most beautiful and fragrant of our hardy Spring flowering bulbs, doing well in almost all soils and situations, for naturalizing, planting among shrubbery and in formal beds. For house or greenhouse culture they are equally desirable, planted in pots or pans.

Culture.—Owing to the various sizes of the bulbs of different varieties, we cannot advisably give the exact depth to plant, but a good rule to follow is to cover the bulb one and one-half times its own depth. For house culture 3 or 4 bulbs can be put in a 5-inch or 6-inch pan or pot and given the same treatment as Hyacinths.

The figures prefixed before the variety denotes the height. The letters following the varieties indicate their relative time of flowering, the A's being the earliest to bloom, the D's the latest.

If Narcissus Bulbs are wanted by Parcel Post, add 15c. per doz., 40c. per 100, for postage.

Narcissus, Bath's Flame

#### MEDIUM TRUMPET NARCISSUS

These are also a popular type of the Narcissus or Daffodil family. Splendid for garden culture, also for growing indoors in pots or pans, or in flats for cut flowers. The figures prefixed before

20 Barrii Conspicuus. C. Broad, spreading perianth of pale yellow, darker yellow cup, edged scarlet; excellent for cutting.

3 for 35c.; \$1.15 per doz.; per 100, \$7.50; \$70.00 per 1000.

- 20 Bath's Flame. C. Deep yellow perianth, with deeply edged orange red trumpet; extra long petals give the flower a distinctive touch. For best results plant in a partially shaded
- location. 35c. each; doz., \$3.25; \$22.00 per 100.

  20 Incomparabilis Bernardino. C. Creamy white perianth, cup pale lemon yellow, flushed pinkish apricot. 25c. each; doz., \$2.25; \$15.00 per 100.
- doz., \$2.25; \$15.00 per 100.

  18 Incomparabilis, Lucifer. C. A very showy variety; perianth white, trumpet orange scarlet. 3 for 40c.; \$1.35 per doz.; per 100, \$9.00; \$85.00 per 1000.

  12 Leedsii, Mrs. Langtry. D. A very free flowering sort with pure white perianth and delicate primrose cup; good for pots; also largely used for naturalizing. 3 for 40c.; \$1.25 per doz.; per 100, \$8.00; \$75.00 per 1000.

  12 Leedsii, White Lady. C. White perianth, canary yellow cup. 3 for 40c.; \$1.35 per doz.; per 100, \$9.00; \$85.00 per 1000.
- 1000.

  15 Sir Watkin (Giant Chalice Flower). C. The flower is probably
- the largest in its class; for moderate forcing as well as bedding on a large scale; perianth sulphur yellow, cup tinged with orange; very early; monster bulbs. 20c. each; doz., \$2.00; \$12.00 per 100.

#### ORCHID FLOWERED NARCISSUS THALIA

This new variety has caused a sensation both in England and Holland and wherever shown; it is a real prize winner. Grows to a height of 15 inches or over; the color of this grand variety is white; 3 to 4 blooms are produced on a stem and so arranged as to remind one of orchid blooms; the flowers are of gigantic size and of the Triandus or Leedsii class. Excellent for February forcing, requiring the same treatment as all other Narcissus. Each, \$1.50; \$15.00 per doz.; 25 bulbs for \$30.00.

### MICHELL'S SUPERB NARCISSUS

If Narcissus Bulbs are wanted by Parcel Post, add 15c. per doz., 40c. per 100, for postage.

Double Narcissus, Primrose Phoenix

#### **DOUBLE NARCISSUS**

These are perfectly hardy, very popular and well adapted to outdoor planting. Most of the varieties are also excellent for house and conservatory growing in pots or pans.

Alba Plena Odorata. A. A very sweet-scented pure white variety called Double Poet's Narcissus; it flowers later than many of the other daffodils and is not desirable for forcing; height about 15 inches. 20c. each; doz., \$2.00; \$13.00 per 100.

Incomparable Double. C. On account of the peculiar suffusion of the colors in the flower, this variety is also known as "Butter and Eggs." Color, yellow with orange center, attractive cut bloom. Its greatest value is for outdoor planting, as it does not force so well. Height about 16 inches. 20c. each; doz., \$2.00; \$12.00 per 100.

Orange Phoenix. C. This is sometimes called "Eggs and Bacon." Light yellow, almost white, with an orange yellow center. Splendid for pot culture. Height, 16 inches. 20c. each; doz., \$2.00; \$12.00 per 100.

Primrose Phoenix. C. Large rose shaped flowers on long stems; color, primrose yellow; a great improvement over Von Sion and growing more in favor each season. 25c. each; doz., \$2.25; \$15.00 per 100.

Sulphur, or Silver Phoenix. C. Flowers very large; blush-white, sulphur colored center; excellent for forcing or outdoor planting. Height, about 18 inches. 20c. each; doz., \$2.00; \$12.00 per 100.

Von Sion (Telamonius Plenus). C. The true double daffodil. The color is a pure golden yellow, entirely free from greentipped flowers, which are often found in cheap grades. For forcing or outdoor planting it has no equal.

First Size Bulbs. 3 for 50c.; \$1.50 per doz.; per 100, \$10.00.

Monster Bulbs. 20c. each; doz., \$2.00; \$13.00 per 100.

#### IMPORTANT NOTICE

In order to obtain best results, all bulbs should be unpacked immediately upon arrival and either planted at once or stored in a cool and dry place.

#### HARDY NARCISSUS IN MIXTURE

For Massing or Cut Flowers.

An excellent blending of varieties suitable for naturalizing or other mass plantings; can be used in borders, fields, woods and in fact anywhere, producing a wide range of color and variety of bloom. A clump of these planted in a corner of your garden will produce a fine lot of flowers for table or house decoration. We offer extra large size bulbs only, which can be depended upon the first season. 3 for 30c.; \$1.00 per doz.; per 100, \$7.00; \$65.00 per 1000.

#### **SWEET SCENTED JONQUILS**

Much prized for their fragrant flowers; perfectly hardy in gardens or naturalized; excellent for rock gardens; also well adapted to indoor culture in pots or pans.

Campernelle Rugulosus. Single yellow; larger than the plain Campernelle. 18 inches. \$8.50; \$80.00 per 1000.

Golden Sceptre. Elegant flowers on stems averaging 20 inches in height; color, a rich golden yellow; sweetly scented. 20c. each; doz., \$2.00; \$12.00 per 100.

Single. Rich yellow; very fragrant; height 12 inches. 3 for 35c.; \$1.15 per doz.; per 100, \$7.50; \$70.00 per 1000.

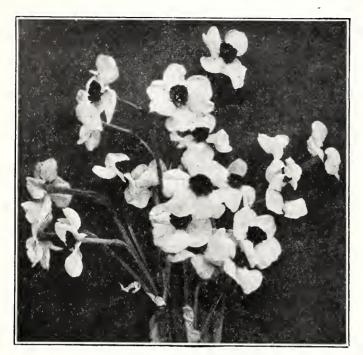

Double. Flowers very double; deep golden-yellov; height 12 inches. 3 for 40c.; \$1.25 per doz.; per 100, \$8.50; \$80.00 per 1000.

Narcissus, Laurens Koster

# NARCISSUS POETICUS POET'S OR PHEASANT EYE NARCISSUS

This is the old favorite type; excellent in the open border or naturalized in grass; perfectly hardy and once planted take care of themselves. Can also be grown indoors in pots or pans with excellent results.

Poeticus, Orange Cup. C. A splendid variety which should be in every collection; perianth creamy white with fine orange colored cups; forces easily and is an excellent cut flower. 20c. each; doz., \$2.00; \$12.00 per 100.

Poeticus Ornatus. C. A much improved form of the ordinary Poeticus, producing larger flowers and blooming two weeks earlier; flowers pure white, saffron cup margined scarlet; valuable for forcing and cutting. Mammoth bulbs, 3 for 35c.; \$1.25 per doz.; per 100, \$8.00; \$75.00 per 1000.

#### SPECIAL NOTICE

When comparing prices, please bear in mind that bulbs such as ours are produced under careful supervision of expert growers; only select quality, large size and the most up-to-date packing methods are employed. Forty years of successful distribution and service is your guarantee.

#### NARCISSUS POETAZ CLUSTER FLOWERED NARCISSUS

This type is a cross between the old Poeticus and Polyanthus varieties; they are hardy, free-flowering and fragrant. Excellent for house culture as well as for the garden border.

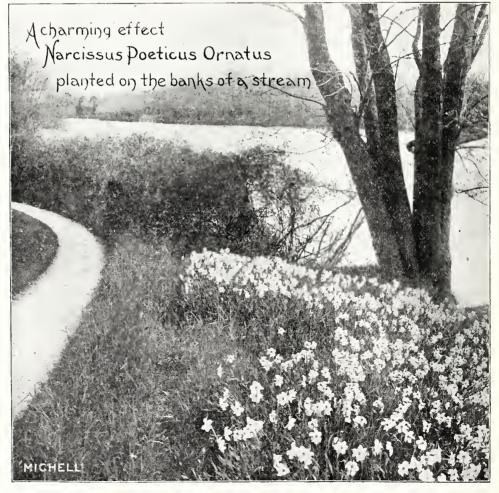

Admiration. C. This variety is well named; flowers are pale yellow, cups edged scarlet; has a delicious Jonquil perfume and of good lasting qualities when cut; a sturdy, robust grower. Large bulbs, 40c. each; doz., \$4.00; \$30.00 per 100.

Elvira. B. The blooms are pure white with delicate yellow cup and come 3 to 4 to a long stem and from 2 to 3 stems are produced from a single bulb; fragrant. Large bulbs, 3 for 40c.; \$1.25 per doz.; per 100, \$8.50; \$80.00 per 1000.

Helios. C. Creamy yellow, pure yellow cup. Large bulbs, 25c. each; doz., \$2.25; \$15.00 per 100.

Laurens Koster. B. A late introduction: flowers large; perianth pure white, with deep orange yellow cup, frequently 4 or 5 flowers are produced on a stem. Large bulbs, 3 for 40c.; \$1.25 per doz.; per 100, \$8.50; \$80.00 per 1000.

Soliel Brilliant. A perfectly hardy form of Soliel d'Or; bright yellow petals, deep orange cups; from 8 to 15 flowers are produced on a stem. Excellent for growing in pans for Easter or earlier blooming and a choice acquisition for your garden. 35c. each; doz., \$3.25; \$22.00 per 100.

Paper White Grandulora Narcissus Growing in Water

# POLYANTHUS NARCISSUS BUNCH FLOWERING

This class of Narcissus is suitable for indoor planting only, excepting south of the Carolinas. We list the three best varieties of this type; these are grown especially for us and the bulbs we have been supplying have been giving the test results. These bulbs can be grown in pebbles and water or soil; they can be had in bloom from Thanksgiving to Easter. Store your bulbs in a cool, dry place when received and for a succession of bloom, plant at intervals of about two weeks from October 1st. to March 1st.

The flowers are produced in clusters and are delightfully fragrant.

#### MICHELL'S BIG BLOOM PAPER WHITE

This is a pure white flowering sort, used extensively for forcing, as it can be brought into bloom in 8 weeks' time. Easily grown in pebbles and water.

#### TESTIMONIAL

Red Lion, Pa.

Received my bulbs in fire condition. Am greatly pleased with them. I rever dreamed of such large Narcissus bulbs.

Mrs. M. J. Gable.

Narcissus, Grand Soliel d'Or

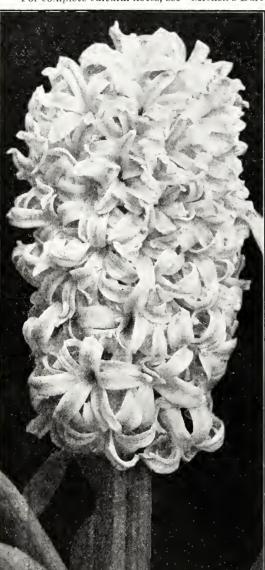

Our Hyacinth bulbs are of best quality, grown by specialists, especially for us. The bulbs are of maximum sizes, fully aged. As Hyacinths are so well known, they need no further description than we have given.

CULTURAL DIRECTIONS FOR HYACINTHS.—Outdoor Culture. Plant in October and November in good, well-drained garden soil. Plant bulbs so that the top will be 3 or 4 inches below the surface and 6 to 8 inches apart. After the ground has frozen, cover with litter, leaves or manure, to protect them from frost; this should be removed in the spring when danger from hard frost is past.

Pot Culture.—Plant any time from September to December, using a 4 or 5 inch pot for single bulbs, or several bulbs may be planted in a larger pot or bulb pan. After planting, water well and place in a cool, dark, airy place until well rooted, after which remove to a cool room and later to a warmer room.

Culture in Glasses.—The single varieties are the best. Place the bulb in a glass, which should be filled with water, so it touches the bottom of the bulb, and place the glasses in a cool, dark place. Change the water occasionally. Keep in the dark until well rooted and then remove to a light, cool place.

For complete cultural notes, see "Michell's Bulb Growing Guide" sent free on request.

### MICHELL'S COLLECTION OF SINGLE NAMED HYACINTHS

Ideal Collection. First size bulbs: for pots, or for growing in water. 1 each, 12 varieties, \$1.50 (by P. P., \$1.70).

Window Garden Collection. Second size bulbs; for growing in pots or in water. 1 each, 12 varieties, \$1.25 (by P. P., \$1.40).

Bedding Collection. Third size bulbs; excellent

Bedding Collection. Third size bulbs; excellent also for pots. 1 each, 12 varieties, \$1.00 (by P. P., \$1.15).

As there is a slight variation as to time of blooming of the various sorts we have indicated their relative time of flowering by letters following the variety the A's being the earliest, the D's the latest.

#### MAMMOTH BULBS (EXHIBITION SIZE)

We offer the largest or top root bulbs, that will produce extra large, well filled spikes; we offer them in single varieties only.

#### SINGLE FIRST SIZE

These are especially desirable for growing in pots or glasses, or for high grade bedding.

#### SINGLE SECOND SIZE

For bedding, the second size named Hyacinths are ideal, being all one height and uniform in appearance. They are also suitable for forcing in pots or pans.

#### FRENCH ROMAN HYACINTHS

French Roman Hyacinths afford a continuous supply of bloom from early winter until late in spring if planted in succession. They are very fragrant.

Easily grown in pots or pans; if bulbs are potted in September, the pots plunged in the open ground for a month, until well rooted, and then brought in the house, they can be had in flower in November or December, and a continuous supply of flowers may be had by bringing in a few pots or pans at intervals of about 2 weeks. The bulbs should be planted quite close together, a 6-inch pot or pan will be sufficiently large for six bulbs. They are not hardy and are not suitable for outdoor planting.

If wanted by Parcel Post, add 15c. per doz., 50c. per 100, for postage.

#### MICHELL'S PREPARED BULB FIBRE

The ideal material in which to grow bulbs, such as Roman Hyacinths, Dutch Hyacinths, Narcissus, Tulips, etc., using vases, crocks, or other receptacles, without drainage. The advantage of this system is that the vases can be placed anywhere about the house, in the drawing room, or dining room, without any fear of water or soil coming through the base of the pots. The bulbs are potted the same way as in ordinary soil, after which they require little attention, except to keep the material moist.

# MICHELL'S SUPERB LILY BULBS

#### MICHELL'S EASTER LILY BULBS

#### For Indoor Culture

Cultural Note.—Upon receiving the bulbs, pot them immediately. Place a handful of well rotted cow manure in the bottom of the pot and place the bulb directly on top, covering it with soil. After watering, place in an outside pit and protect from the direct rays of the sun; cover well with soil, ashes or any other suitable litter. When the bulbs have become thoroughly rooted, bring inside, in a temperature of about 60 degrees; let the plants grow slowly under a bench or some other suitable place until about 6 inches high, then place on top of the bench. About two months before Easter they can be brought into a warmer temperature and gradually forced into flower and height at one time.

#### LILIUM CANDIDUM

This variety is also called St. Joseph's Madonna, or Annunciation Lily. One of the most popular and satisfactory of American garden lilies. Pure white flowers produced on straight stems, bearing from 10 to 30 pure white blooms of good size and substance, and delightfully fragrant. Effective planting is the result of massing them in clumps or borders. Our bulbs are grown where they have a reputation of growing the finest in the world. To insure absolute success, plant the bulbs as early as possible—September preferred—6 inches deep, imbedded in sand and placed on their side; height, 4 feet; blooms in June. Each Doz By P. 100

### MICHELL'S HARDY GARDEN LILIES

#### Special Notice Regarding Delivery

Most of the varieties listed below will arrive in time for fall planting. It often happens, however, that some varieties reach us too late for autumn planting. Orders for these will be held for early spring delivery. When ordering, please specify if you desire fall or spring delivery.

It is advisable to prepare your lily bed in the early autumn and cover with 3 or 4 inches of litter, this will prevent freezing and will permit safe planting of the late arrivals.

For complete cultural notes, see "Michell's Bulb Growing Guide" sent free on request.

If Lily Bulbs are wanted by Parcel Post, add 25c. per doz. for postage.

### MICHELL'S MISCELLANEOUS BULBS

For Winter and Spring Flowering

#### AMARYLLIS (Ready in October)

One of the most gorgeous showy house plants, giving splendid satisfaction, not only because of their requiring little care, but of their everlasting nature and tendency to increase. Average height, 11/2 to 2 feet.

Cultural Directions. When bulbs are received they should be placed where they will always be slightly moist and warm. Do not pot up the bulbs until the flower buds appear; when first potted, give very little water and promote growth by giving moderate bottom heat; increase the supply of water as the plants grow.

Belladonna. Clusters of bright pink flowers during late summer and fall. 35c. each; doz., \$3.50 (by P. P., \$3.65); \$25.00 per 100.

Formosissima. Brilliant crimson. 75c. each; doz., \$7.50 (by P. P., \$7.65); \$60.00 per 100.

Hippeastrum Equestre. Large flowers of a brilliant orange scarlet with white throat. 40c. each; doz., \$4.00 (by P. P., \$4.25); \$30.00 per 100.

Giant American Hybrids. The finest race of Amaryllis in cultivation, exceeding in the size and fine form of their flowers as well as in the diversity of colors and markings all former hybrids; flowers striped and flaked.

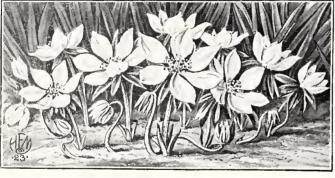

Large bulbs, 75c. each; \$7.50 per doz. (by P. P., 7.85); per 100, \$60.00.

Mammoth Bulbs, \$1.25 each; doz., \$13.50 (by P. P.,

\$14.00); \$27.00 for 25 bulbs.

Amaryllis, Giant American Hybrids

Aconite

#### ACONITE, WINTER (Eranthis Hyemalis)

A very early spring flowering bulb, producing golden yellow flowers. Prefers a moist, shady location; perfectly hardy; excellent for the rockery; height about 6 inches. 50c. per doz.; per 100, \$3.00 (by P. P., \$3.15); \$25.00 per 1000.

ANEMONE (Windflower)

For brilliancy of color and profusion of bloom, none of the Spring flowers surpass the Anemone; they are an excellent decorative plant for house or garden. The foliage is most attractive, above all the plant is crowned with long stemmed beautiful flowers in many colors and shades. If planted outdoors in the Fall, they must be well protected with leaves or other litter. They are also well adapted for pot culture and are excellent for cutting; 11/2 feet. DeCaen. Single French varieties in mixed colors. 70c. per doz.;

per 100, \$4.50 (by parcel post, \$4.65); \$40.00 per 1000. His Excellency. Beautiful, large flowering Poppy Anemone; deep scarlet, thick petals, long stems; 75c. per doz.; per 100, \$5.00 (by P. P., \$5.15); \$45.00 per 1000.

St. Brigid. A greatly improved form with immense semi-double

and double flowers in many colors. 90c. per doz.; per 100, \$6.00 (by P. P., \$6.15); \$55.00 per 1000.

**BRODIAEAS** 

Choice Mixed. A small bulb producing grassy leaves near the ground; slender, stiff stems, 6 to 8 inches long, with small waxy flowers in shades of blue and purple; fine for rockeries. Doz., 80c.; \$5.50 per 100 (by P. P., \$5.65); per 1000, \$50.00. Treat your bulbs before planting with Semesan, for best results.

#### FANCY LEAVED CALADIUMS

These are grown for us by one of the leading Hybridizers. They are charming conservatory plants. Being of a tropical nature, they like a warm temperature. They do quite well outdoors during the summer, if planted in a shaded place. The foliage covers a wide range of colors, making a grand display. The bulbs should be started in moss with plenty of bottom heat.

Ask for leaflet on their culture and care.

Michell's Giant Crocus

#### **CROCUS**

One of the earliest flowers to bloom in spring; most effective for borders or beds, also for planting in clumps amongst shrubbery and for the rock garden. In lawns, planted in the grass the Crocus are extremely effective.

An effective method of planting is to scatter them over the lawn by digging up a small piece of sod here and there and placing one or two bulbs in each spot, this gives a very pretty effect.

The Giant Flowering varieties are also splendid for flowering in pots, but too severe forcing must not be attempted; height 6 inches.

If wanted by Parcel Post, add 15c. per 100, for postage.

#### **GIANT NAMED CROCUS**

The bulbs of these varieties are very large and each bulb is capable of producing several flowers of large size.

Freesia, Golden Daffodil

#### FREESIA "PURITY"

This grand type supersedes all the old varieties of Freesias. The flowers are almost twice the size of the regular type; they also differ somewhat, being a pure glistening white; the stems are often 15 inches long and very wiry, rendering it a most valuable cut flower. Each bulb will produce 3 or 4 flower stems.

Lily of the Valley

### LILY OF THE VALLEY

(Ready in December)

A beautiful pure white flower; principally used for winter forcing. Very fragrant and produced in abundance. For indoor culture plant about 25 pips or roots in a 7-inch pot or pan, place outside, where they should be left until they have been subjected to several nights' freezing, which brings them into flower more readily. When grown outdoors always plant in a shaded place, preferably moist.

Michell's Fancy Giant Flowering. 25 for \$1.75 (by P. P., \$1.85); \$6.50 per 100 (by P. P., \$6.75); per 1000, \$60.00.

Bundles or Clumps. For outdoor planting only. Bundles contain 12 good size pips, with good root growth, all of which will flower with the proper care. They are especially imported from abroad, the best of the stock being selected for us. We can make shipment of these from November until May. 65c. per bundle (by P. P., 75c.); doz. bundles, \$6.75 (by P. P., \$7.00); \$52.50 per 100 bundles.

#### COLD STORAGE LILY OF THE VALLEY

#### Ready for Delivery Now

Our cold storage Lily-of-the-Valley pips are of high grade quality and planted at intervals either in soil, peat or bulb fibre and given a gentle heat and plenty of water an abundance of these fragrant flowers may be had all through the winter and early spring; will bloom in three weeks after planting.

## MICHELL'S DORMANT FIELD-GROWN ROSES

## FOR FALL PLANTING

Many of the most successful Rose growers prefer planting their Roses in the Autumn. We are now booking orders for strong two-year-old Field-Grown budded plants, which will be ready for shipment just as soon as they are properly ripened by frost, which is usually late in October or early in November. Plants shipped in the dormant state take up but very little room and they may be safely shipped by parcel post. If there is danger of the ground freezing before the arrival of the plants, the space where you wish to plant them may be protected by a covering of leaves or other loose litter. When the plants arrive, plant them so that the bud is covered with at least one inch of soil; then make a mound of earth around the base of the plant about twelve inches high; by doing this all of the buds on the lower end of the branches are covered with soil; this covering protects them from the alternate freezing and thawing, which is so injurious. Early in the Spring, before growth starts—but after danger of severe frost is over, this covering of earth should be removed and the plants pruned.

Betty. A superb rose with blooms of good size, full and globular, with a delightful fragrance. The color is a coppery-rose, overspread with golden-yellow. An excellent Autumn blooming variety.

Betty Uprichard. Well formed medium sized flowers of a pleasing combination of colors, the inside of petals being salmonpink, the outside carmine with copper and orange suffusion.

Briarcliff. A recent introduction which gives promise of a great future. The size, form, color, stem and foliage leave nothing to be desired. A glowing rose-pink in color with delightful fragrance.

Chas. K. Douglas. Fine long-pointed buds opening to large flowers of bright crimson-scarlet; slightly fragrant. A strong healthy grower.

Columbia. One of the most popular of the newer roses, being a vigorous grower and very free flowering. The flowers are of a pleasing shade of rose pink, large, fragrant and perfect in form.

Dame Edith Helen. Shapely buds and substantial high centered blooms of clear pink, sweetly scented. A strong grower and very free flowering.

Duchess of Wellington. Intense saffron yellow changing to coppery yellow. Flowers large, moderately full, of the Killarney type, beautiful buds and delightfully fragrant. A superb yellow rose and a splendid grower.

Edel. A British introduction of exhibition quality, producing large beautifully formed flowers of ivory-white passing to pure white. A strong grower of uniform habit, very free flowering, opening in all weathers and delightfully fragrant.

Etoile de France. Well formed buds that develop into full open flowers of red and soft velvet crimson, shading to vivid cerise. One of the very best and most dependable Roses of its color; needed in every garden.

Etoile de Hollande. Brilliant red flowers of large size, perfect in half open state, showing clean, attractive centers when fully open; petals enormous; very fragrant. A strong, vigorous and healthy grower; very free flowering.

Francis Scott Key. Large double flowers of rich crimson-red; a strong grower and very free flowering.

Gen. MacArthur. A well known rose, being one of the earliest and most perpetual flowering sorts. The blooms are large, full and delightfully fragrant. In color it is a rich crimson scarlet: growth is vigorous.

scarlet; growth is vigorous.

Gruss an Teplitz. This is a rose for everybody, being the most profuse blooming crimson rose in existence. The color is of the richest scarlet, shading to a velvety crimson; very fragrant. It will succeed under the most ordinary conditions, doing well where other roses fail.

Hadley. One of the very best garden roses; deep rich velvety crimson in color and one of the most fragrant roses in our collection. Free bloomer with long stiff stems.

Imperial Potentate. A recent introduction, but fast becoming one of the most popular garden varieties; beautifully shaped buds opening to well formed, large double, sweet scented flowers o a delightful rose-pink.

Independence Day. Flaming yellow buds, shaded copper, opening to fairly large flowers of a light orange-pink. A strong upright grover and very free flowering.

upright grower and very free flowering.

Jean C. N. Forestier. Reddish buds, opening to fragrant flowers of carmine, orange and yellow; free flowering and a strong grower.

Jonkheer J. L. Mock. A favorite with hundreds of Rose lovers. The flowers are large and of more than ordinary beauty. The deep imperial pink on the outside of the petals and the shining silvery pink on the inside make a double colored bloom.

Julien Potin (Golden Pernet). Long pointed buds opening into large full flowers of a pleasing golden-yellow. A strong upright grower and profuse bloomer.

Hybrid Tea Rose, Dame Edith Helen

Kaiserin Augusta Victoria. An old variety but still one of the best and it should be in every collection. In color it is a soft pearly white tinted with lemon.

Killarney, Double White. A pure white but more double form of Killarney. A beautiful Rose.

Killarney Queen. Another excellent development of the Killarney family, bearing distinct clear pink blooms, somewhat darker than the parent sort, these blooms being large and well-formed.

Lady Alice Stanley. A rose that is admired by every one, not only for its freedom of bloom and fragrance, but also for its color, which is a beautiful shade of coral-rose on the outside of the petals with purple flesh on the inside.

Lady Ashtown. Extremely beautiful flowers of pale carminepink, shading to golden yellow at the base of the petals. The blooms are large, globular, and well formed, rather higher in the center than at the edge. Excellent for garden or greenhouse and a profuse bloomer all season until frost.

Lady Hillingdon. One of the best Tea Roses of its color, deep apricot yellow throughout. It varies from medium to large size and is very beautiful both in bud and in flower. The plant is hardy, a strong grower and very floriferous.

Los Angeles. One of the finest Roses ever introduced, In color a luminous flame pink toned with coral and shaded with translucent gold at the base of the petals. The buds are long, pointed and extend into a flower of mammoth proportions. The growth is vigorous to a degree. The beauty of the form and ever increasing wealth of color are maintained from the incipient bud until the last petal drops.

Mme. Butterfly. While this is a sport of Ophelia, it shows an even better growth, with more and larger flowers, in a brilliant pink, suffused apricot and gold. These flowers are in the ideal Rose form, of good texture and fragrance, and are unusually enduring. The plant is free and fine in growth and habit.

Mme. Caroline Testout. One of the most popular and valuable bedding varieties; large globular flowers of bright satiny rose. with brighter center. Strong vigorous grower; very free flowering and fragrant; particularly fine in Autumn.

Price, any of the above, 75c. each (by P. P., 90c.); per doz., \$7.50; \$60.00 per 100.

6 Roses supplied at the dozen rate, 25 supplied at the 100 rate.

## FOR FALL PLANTING

- Mme. Edouard Herriot. This is the celebrated "Daily Mail" rose which has been so extensively advertised. In color it is coral red, shaded with yellow and bright rosy scarlet, with yellow at the base; a wonderful combination of most pleasing colors.
- Mme. Jules Bouche. Beautiful white flowers, sometimes shading to light blush in the center. One of the best white bedding Roses to date.
- Mme. Poincaire. A most desirable variety, of vigorous growth and very free flowering. Buds are long and open into full double salmon-pink flowers, shading to apricot in the center.
- Miss Lolita Armour. This beautiful Rose won the Gold Medal at the Bagatelle Gardens in Paris, France, in 1921. It is a strong vigorous grower and very free-flowering. The buds are well shaped, chrome-yellow at the base, shading to orange and copper. As the flowers expand they develop to a deep coral red; very fragrant.
- Mrs. Aaron Ward. A very free blooming variety of vigorous but compact growth. The flowers, which are of splendid form are full double and are equally attractive when in full bloom as in the bud state. The color is a distinct Indian yellow which under certain conditions becomes yellow tinted white. A favorite everywhere.
- Mrs. Wakefield Christie-Miller. Large, globular, peony-flowered blooms of pearly blush, shaded salmon-pink, the outside of the petals being vermilion and rose, which lovely combination is not affected by the hottest sun. Plants strong, of erect and vigorous growth, and with a blooming habit taking it clear through the season and until late autumn. Should be in every selection for the garden.
- Ophelia. This is a variety that has made such a record for itself, that it must be classed among the very best, a rose that is admired by everybody. The flowers held erect on long stems are of perfect form, are of a pleasing shade of light salmon flesh shading to pale yellow at the base of the petals.
- Premier. Beautiful, rich deep pink flowers of large size and full form, on long stiff stems, fragrant. A very good late Summer and Fall variety.
- Radiance. A Rose of American origin and to our mind one of the very best varieties in cultivation today. It is an ideal bedder, producing large flowers throughout the Summer when many other varieties are out of bloom; in color a beautiful even shade of pink. This Rose should be in every garden.
- Red Radiance. A counterpart of Radiance from which it is a "sport," possessing all of the good points of that valuable variety, but differing in color, which is bright cerise-red.
- Rose Marie. One of the best bedding roses. It produces beautiful long buds which open into large flowers of perfect form and of a pleasing clear rose-pink in color.
- Souvenir de Claudius Pernet. A most vigorous grower of erect branching habit; beautiful, brilliant green foliage; long pointed buds of exquisite shape, carried on long, stiff stems. Very large full flowers with elongated deep petals, a beautifully formed bloom. Color, a most striking sunflower yellow, deeper in the center without any color blending and which is retained without fading even in the warmest weather.
- Souv. de Georges Pernet. A strong vigorous grower and free bloomer. The flowers are large; globular in form; color, Orient red shading to a cochineal-carmine at the end of the petals, the whole being suffused with a golden sheen.
- Sunburst. A vigorous grower with erect or slightly spreading habit and dark bronzy foliage. The flowers are of medium size, full and of fine elongated cup form; color a superb cadmium-yellow passing to yellow-orange in the center.
- **Talisman.** A new American rose of exceptional coloring; the outside of the petals is bright yellow, gold and pink; as the flower opens it becomes bright apricot, gold and rose-pink. The bud is long, pointed and opens into a full double flower. A strong grower with glossy foliage and very free flowering.
- **Templar.** Long oval buds opening to very double, fragrant crimson flowers. Very good early in the season and in the Autumn.

William F. Dreer. Flowers similar in shape to Los Angeles and like that variety, beautiful in all stages of development; are at their best in the half-expanded flower; these in expanding, are of a soft, silvery shell-pink, the base of the petals of a rich golden-yellow which, at certain stages of development, gives a golden suffusion to the entire flower, this golden suffusion being particularly brilliant early and late in the season.

# HARDY CLIMBING AND RAMBLER ROSES

As an ornamental plant for covering verandas, porches, side walls, pillars, fences, etc., these are unequalled, calling forth more admiration than anything else that can be used. They require no pruning in the Spring beyond the cutting out of very old or dead wood and shortening of the laterals and long canes to make the growth conform to the space to be covered, but a severe pruning in July directly after they have finished flowering is beneficial.

- American Pillar. The large single flowers are a lovely shade of cherry pink, with a clear white eye surrounding numerous golden yellow stamens.
- Aviateur Bleriot. A strong growing plant with beautiful glossy insect and disease proof foliage, bearing large clusters of medium sized double flowers of a saffron yellow.
- Bess Lovett. Resembles Climbing American Beauty is shape of flower, but much brighter in color, being a clear bright red, double, full cupped form and of notable lasting quality.
- Christine Wright. A beautiful rose of strong climbing habit, producing double flowers 3 to 4 inches in diameter, singly and in clusters, of a wild rose pink.
- Climbing American Beauty. The name of this rose is rather misleading, yet on its own merits it is a splendid climber. It has but one blooming season, June, when it bears very abundantly a very bright self colored, medium pink flower.
- **Dr. W. Van Fleet.** One of the most important climbing roses, having perfectly formed buds, long and pointed, deep pink in color and very solid. The full blown flowers are very large, borne on long stems, fragrant and fine for cutting.
- Dorothy Perkins. Beautiful shell pink, fragrant and full, blooming in clusters in June. The most popular of all climbing roses during the past few years. This is a very good rose for covering stone walls, fences, embankments and arbors.
- Emily Gray. The buds are long and pointed, of splendid shape; in color a beautiful light orange-yellow, changing to pale orange as they expand; they are borne on stiff stems of sufficient length for cutting.
- Excelsa. Here we have a worthy successor to Crimson Rambler, being equally as free flowering as that variety but without its unsatisfactory foliage, this variety being a true Wichuriana rambler with all of the strong wiry growth and beautiful foliage of this desirable class. Really the best double red rambler.
- Gardenia. A very desirable Yellow Climbing Rose. The flowers are of a pleasing shade of yellow in bud form, turning to a creamy white as the flowers open.
- Paul's Scarlet Climber. No other rose in any class can compare with it for brilliancy of color, which is a vivid scarlet that is maintained without burning or bleaching until the petals fall.
- Silver Moon. An indispensable hardy climber having long well shaped buds, creamy yellow on first appearance, opening into immense Clematis like flowers of a waxy whiteness. The center is a mass of bright yellow stamens, making a wonderful contrast.
- **Tausendschoen.** The individual flowers are of a most elegant and graceful form. In color it is a most delicate shade of soft pink when first opening, changing to carmine on the reverse of the petals when fully expanded. The flowers are produced in trusses, each truss almost a bouquet in itself.
- White Dorothy. A handsome pure white sport from the old favorite Dorothy Perkins, and it has all of the finer qualities found in that charming variety.

Prices on any of the above Roses, 75c. each (by P. P., 90c.); \$7.50 per doz.; per 103, \$60.00; 6 Roses supplied at the dozen rate, 25 supplied at the 100 rate.

Year by year these old fashioned hardy flowers are gaining favor and deservedly so, as there is not a time during the whole flowering season when some variety is not in bloom; they are especially valuable during the late Summer and Autumn, when there are but few shrubs in bloom. From early April they continue with constant changing variety throughout the Summer and Fall, when they are stropped only by severe freezing weather. Hardy Perennials appear year after year, and as each variety has a fixed time for blooming, a selection can be made that will give flowers to cut from early Spring until late Fall. The most satisfactory arrangement is to plant them in a border, which can be made in front of a hedge, fence or wall, or in the open garden; the soil should be dug to a depth of The plants should be placed in groups of three or more of one variety together, the taller growing sorts at the back, the medium heights in the center and the dwarf varieties in front; they should also be placed so as to have some flowers in all parts of the border at all times. This can be easily arranged by referring to our descriptions as to the time of flowering. Our book on "The Hardy Flower Garden" is an instructive publication, and can be had free on request. We offer only such varieties as can be planted in the autumn.

All plants are forwarded on receipt of order unless instructed to the contrary, and are sent by Express, purchaser paying charges. We can forward small plants or small numbers of plants by Parcel Post, and if wanted sent in this way add the amount as stated in connection with the item, to cover postage and packing charges, up to and including the third zone; for other zones add additional postage.

SPECIAL NOTICE ON GUARANTEE

We spare no effort to supply plants of the best quality in first-class living condition. On account of the many causes beyond our control we regret we cannot guarantee this stock to live and establish itself, as that is usually entirely within the power of the buyer or planter.

ACHILLEA (Milfoil or Yarrow)

Filipendulina (Fern-leaved Yarrow). Finely-cut foliage and brilliant yellow heads of flowers, lasting in full beauty all summer; 4 to 5 feet.

Millefolium Cerise Queen (Rosy Milfoil). Finely cut, deep green foliage; flowers cherry red in dense heads; 18 inches high. Ptarmica Boule de Neige (Ball of Snow). An improvement on

The Pearl; the flowers, while not quite so large, are of more perfect form, with fuller centers, making it appear purer in color. The Pearl. A mass of double pure white flowers throughout the entire Summer. The strong erect stems make it one of the best Summer flowers for cutting.

Tomentosa (Wooley Yarrow). Handsome cut foliage with bright yellow flowers. June; 12 inches. Price, 4 for \$1.00 (by P.P., \$1.15); \$2.50 per doz.; per 100, \$15.00.

ACONITUM (Monkshood or Helmet Flower)

Fischeri. A dwarf variety growing 18 inches high, with large

pale blue flowers in September and October.

Spark's Variety. The darkest blue of all; flowers in June; 3 feet.

Price, 3 for \$1.00 (by P.P., \$1.15); \$3.50 per doz.; per 100, \$25.00.

AGROSTEMMA (Rose Campion)

Stout, erect-growing plants, with silvery foliage, which contrasts well with the showy flowers produced during June and July. Coronaria (Mullein Pink). Bright rosy crimson; 2½ to 3 feet. Coronaria Alba. A pure white variety. Price, 4 for \$1.00 (by P.P., \$1.15); \$2.50 per doz.; per 100, \$15.00.

ALYSSUM (Gold Dust or Basket of Gold)

Saxatile Compactum. An excellent low spreading plant for rockery or border, growing about 10 inches high and producing in May masses of golden yellow flowers. 4 for \$1.00 (by P.P., \$1.15); \$2.50 per doz.; per 100, \$15.00.

ANCHUSA (Sea Bugloss)

Italica "Dropmore Variety." Plants grow 4 feet high in pyramidal shape, branch freely and are loaded with bright blue Forget-me-not-like flowers in June; showy and valuable. 4 for \$1.00 (by P. P., \$1.15); \$2.50 per doz.; per 100, \$15.00.

AQUILEGIA (Columbine)

For spring blooming these are invaluable, producing their graceful spurred flowers on stems rising 2 feet over their attractive foliage, during May and June. For rockery gardens, semi-shaded places, in hardy borders or planted in clumps, they are very effective.

Michell's Long Spurred Hybrids. This is the most admired type of Columbines. The flowers of largest size vary in color through charming tones of cream, pink, lavender, blue, white, red, etc., hardly any two being exactly alike. We offer them in mixed colors only.

Canadensis (Common American Columbine). The native bright

red and yellow variety and one of the brightest. Chrysantha (Golden Columbine). Bright yellow, long-spurred

Coerulea (Rocky Mountain Columbine). Bright blue and white long-spurred flowers.

Mrs. Scott Elliott Hybrids. The world's finest strain, consisting of the most wonderful colors, with very long-spurred flowers. Rose Queen. A newer variety of a pleasing shade of delicate pink;

long-spurred flowers.

Vulgaris (Common European Columbine). Violet blue. Price of Aquilegias, 4 for \$1.00 (by P.P., \$1.15); \$2.50 per doz.; per 100, \$18.00.

Agailegia (Columbine) Long Spurred

### ARABIS (Rock Cress

Alpina. One of the most desirable of the very early springflowering plants that is especially adapted for edging and for the rock garden, but does equally well in the border, forming a dense carpet, completely covered with pure white flowers. Lasts for a long time in bloom. 4 for \$1.00 (by P. P., \$1.15); \$2.50 per doz.; per 100, \$15.00.

ARMERIA (Sea Pink or Thrift)

Attractive dwarf plants that will succeed in any soil, forming evergreen tufts of bright green foliage, from which innumerable flowers appear in dense heads, on stiff, wiry stems, from 9 to 12 inches high. They flower more or less continuously from early spring until late in the fall. Very useful in the rockery.

Laucheana Rosea. Bright rose. 3 for \$1.00 (by P. P., \$1.15);

\$3.00 per doz.; per 100, \$18.00.

ASCLEPIAS (Butterfly Weed)

uberosa. Very showy native plants, about 2 feet high, producing their flowers of brilliant orange-scarlet during July and August. 4 for \$1.00 (by P. P., \$1.15); \$2.50 per doz.; per 100 \$15.00.

#### ARTEMISIA

A most useful class of plants either for the border or for filling in within shrubbery; ornamental foliage. The varieties we offer stand cutting down to 5 or 6 inches when used in carpet bedding. Abrotanum (Old Man, or Southern-wood). Dark green, finely

cut foliage, with pleasant aromatic odor; 2 feet.

Silver King. A new variety with beautiful, bright silvery foliage, which can be cut and dried, and which will retain its silver color all winter.

Stelleriana (Old Woman). Deeply-cut silvery foliage; much used

in carpet bedding; 18 inches.

Lactifolia. A variety of great merit; flowers white, in much branched panicles; very fragrant; 4 feet; Aug., Sept. Should be planted in fertile, moist soil.

Price of Artemisias, 4 for \$1.00 (by P. P., \$1.15); \$2.50 per

doz.; per 100, \$15.00.

#### HARDY ASTERS

## **FALL FLOWERING VARIETIES**

Anita Ballard. Light Lobelia blue, shading to lighter center. Early and free. 3 feet.

Autumn Beauty. An exquisite shade of light blue; very large flowers, commencing to bloom in the late summer and continuing almost up to frost time; height, about 4 feet.

Blue Geni. Large, rich violet-blue; 3 feet.
Glory of Colwall. A splendid improvement on the variety Beauty of Colwall; good-sized, nearly double ageratum-blue flowers; free flowering; 2½ feet; September and October.

Miss Eisele. Very large flowers of a beautiful lavender blue; one of the best; 3 feet.

Novae Angliae. Bright violet purple; 4 feet.

Novi Belgii Climax. Of strong, vigorous habit, 5 feet high; branched pyramidical-shaped flower stems; lavender-blue flowers. August-October.

Roseum Superbum. This is one of the best hardy Asters we

have ever seen. The color is almost red; profuse bloomer.

Sam Banham. Very large and graceful pure white flowers.

One of the earliest to bloom; 3 feet.

St. Egwin. Densely branched, producing beautiful pink flowers; 3 feet: September.

Price, 4 for \$1.00 (by P. P., \$1.15); \$2.50 per doz.; per 100. \$15.00

## DWARF ALPINE ASTERS

Alpinus. Indispensable for the rockery or edge of hardy borders; grows 6 to 10 inches high and bears large, showy bluish-purple flowers in May and June.

Alpinus Albus. Identical to the above, but with pure white

flowers.

Sub-coeruleus. Forms a dense tuft of leaves from which spring many leafless stems 12 inches high, bearing in June and July large, bluish-violet flowers.

Price of Alpine Asters, 4 for \$1.00 (by P. P., \$1.15); \$2.50 per

doz.; per 100, \$18.00.

#### JAPANESE HARDY ASTER

Mauve Cushion. A distinct species. Forms a circular cushion-like plant 2½ feet across, rarely exceeding 9 inches in height. Flowers of delicate, soft mauve, with silvery white reflection, over 1¼ inches in diameter and produced in such lavish profusion as to completely cover the plant; the blooms begin to expand early in October, but are not at their best until November. 4 for \$1.00 (by P.P., \$1.15); \$2.50 per doz.; per 100, \$18.00.

#### ASTILBE ARENDSI

## MICHELL'S GIANT FLOWERING PEONIES

Next to Roses these are the most popular June flowers, and justly so, for they lend themselves to almost any style of planting, while for the little care required they give a variety of color and wealth of bloom unequalled by any other plant. Their requirements are few; they will succeed in any good garden soil in an open sunny position. Care should be taken, however, to keep all fresh manure away from the roots—if barnyard manure is used it must be thoroughly decomposed—if you are unable to procure this, Bone Meal makes a good fertilizer. Peonies may be planted any time after September 1st until the ground freezes in the Autumn, and in the early Spring until the season is too far advanced; the best time, however, is during September and October, as they make roots during the moist cool weather of the Autumn and consequently carry through the Winter in better shape. The roots should be set so that the top or upper eyes are about two or not more than three inches below the level of the soil; do not set the roots flat, but stand them up. For the best results Peonies should be planted from three to four feet apart each way, according to the space at your disposal; the ground around them should be well cultivated at all times and in the Spring after growth starts they should have an abundance of water if the season is at all dry. When cutting the flowers always leave one or two bottom leaves; it is best to leave a few flowers on the plant also, as it is of vital importance that sufficient foliage be left to develop the eyes under the ground for next season's growth. Newly planted roots may not develop a characteristic flower the first season, in fact it is usually not until the third year that perfect flowers true to description will be produced. Peonies are seldom troubled with any disease or insect pests; ants sometimes appear on the buds coming to gather a sweet gum which the bud exudes while developing; they will do no harm and will disappear when the flower opens.

- Adolph Rosseau (Dessert & Mechin, 1890). Early midseason. Very tall strong grower with erect, stiff stems and large perfectly formed flowers; dark velvety red with garnet hues and a distinct metallic reflex. Semi-double type. 75c. each.

## MICHELL'S CLIMBING PLANTS AND VINES

Vines play an important part in the landscape of the home. There are so many purposes they fill that we cannot recommend too highly their general use.

- AKEBIA—Quinata. A quick-growing vine; small, fine-lobed, half-evergreen leaves and purplish brown or chocolate-colored flowers, which have a delicious odor. This plant is highly desirable where a dense shade is not desired. Extra strong plants, 50c. each (by P. P., 65c.); \$5.00 per doz.
- AMPELOPSIS—Quinquefolia (Virginia Creeper). The large handsome, dark green leaves are deeply cut into five lobes; in the autumn the foliage turns a beautiful rich crimson; especially adapted to covering tree stumps and trunks. Extra strong plants, 50c. each (by P. P., 60c.); per doz., \$5.00.
- AMPELOPSIS—Veitchii (Boston Ivy). The popular climber for brick and stone buildings and walls. The leaves are a beautiful deep green which in the autumn turn to a coppery red. Strong plants, 50c. each (by P. P., 60c.); per doz., \$5.00.
- ARISTOLOCHIA—Sipho (Dutchman's Pipe). Handsome light green leaves, giving a quick, dense shade. The brown flowers are shaped like the bowl of a pipe. Large plants \$1.00 each (by P. P., \$1.25).
- BIGNONIA—Grandiflora (Trumpet Vine). A strong-growing vine, with rich green foliage and trumpet-shaped flowers; free-flowering; color, orange-red. Strong plants, \$1.00 each (by P. P., \$1.15).
- CELASTRUS SCANDENS (Bittersweet or Waxwort). A vine of rapid growth. In the early summer it produces yellow flowers, which by autumn have turned to bright, orange-colored fruits with red markings. Extra strong plants, 50c. each (by P. P., 60c.).
- CLEMATIS—Paniculata (Japanese Virgin's Bower). A strong luxuriant grower, with light green foliage. At the close of August innumerable small, star-like flowers cover the vine in a sheet of fragrant white. It delights in plenty of sunlight, rich soil and plenty of water in dry weather. Strong plants 4 for \$1.00 (by P. P., \$1.15); \$2.50 per doz. (by P. P., \$2.75); \$15.00 per 100. Extra strong plants, 50c. each (by P. P., 60c.); per doz., \$5.00; \$35.00 per 100.
- EUONYMOUS—Radicans. Self-clinging vine, suitable for covering walls, stumps or rockeries, or wherever a vine of slow growing habit is desired; green foliage.
- —Variegata. Leaves are variegated; otherwise like the above variety.
- Vegeta. This plant is regarded far too little in importance as a strictly A-1 variety for climbing stone walls of buildings or otherwise; it ranks favorably with English Ivy, except that it is evergreen and does not winter kill or shed its foliage. Tht foliage is larger than that of the type Radicans, and the plane produces an orange-colored berry, which remains on the plant the most part of the winter. Euonymous Vegeta should be planted more extensively than it is.

Price of any of the above Euonymous, strong 2-year plants, 3 for \$1.00 (by P. P., \$1.15); \$3.00 per doz.; per 100, \$18.00.

- HONEYSUCKLE. This favorite requires very little comment or description, always yielding a wealth of fragrant bloom.
- Chinese Evergreen. Yellow and white variegated flowers; very fragrant; blooms the entire season.
- Halliana (Hall's Honeysuckle). Flowers pure white, turning to yellow; hardy evergreen; flowers from June until frost.
- Red Coral or Scarlet Trumpet. Bright red, trumpet-shaped flowers. Blooms all summer.
- Variegated (Aurea Reticulata). Foliage beautifully mottled yellow and green; flowers white and yellow.

Price of any of the above Honeysuckles, strong 2-year plants, 50c. each (by P. P., 65c.); \$5.00 per doz.; per 100, \$35.00.

HOP VINE (*Japanese*). A rapid grower, with dark green foliage and bearing a profusion of seed-pods, suitable for many domestic purposes. Strong pot-plants, 4 for \$1.00 (by P. P., \$1.15); doz., \$2.50 (by P. P., \$2.75).

- IVY (English). This is an invaluable plant for covering brick and stone walls and buildings. It rarely ever dies out and needs no attention. 4-inch pot-plants, 50c. each (by P. P., 65c.); per doz., \$5.00; \$40.00 per 100.
- LATHYRUS (Hardy Pea). This is a splendid plant for training on pillars, columns and similar places; it flowers during the greater part of the summer, and is a really splendid cut flower, lasting well, and very effective.
- Latifolius. Rich red.
- Pink Beauty. Beautiful rose pink.
- White Pearl. Pure white, giant flower trusses.

Price of Lathyrus, strong plants, 4 for \$1.00 (by P. P., \$1.15); \$2.50 per doz.; per 100, \$15.00.

LYCIUM (Matrimony Vine)—Barbarum. A dense growing climber, somewhat shrubby in nature. In late summer the small purple flowers are followed by a crop of red berries, which remain until late winter. Extra heavy plants, 50c. each (by P. P., 65c.); \$5.00 per doz.

Polygonum Auberti

POLYGONUM—Auberti. For porches, lattice work, fences. pergolas and buildings. A useful vine which is perfectly hardy and free from disease or pests. It is quick growing, a small plant will make twenty-five to thirty feet of growth the first summer; snowy white flowers, borne in long clusters, which turn rose color with age. The foliage is clean looking and apart from its wonderful flower effect will please everyone. It will not cling to the wall, but will ramble over anything that will support it.

Extra strong pot-grown plants, 75c. each (by P. P., 90c.).

- WISTARIA. This flowers in the latitude of Philadelphia during May. A strong developed vine produces hundreds of flower panicles, while no foliage is visible until after the flower is faded. They thrive best in the sun, and with an application of cow manure once or twice a season they respond marvelously by an extra growth and an abundance of flowers.
- Chinensis (Chinese Wistaria). Pale blue, somewhat fragrant.
- Chinensis Alba. A beautiful white flowering form of the above.

Price of Wistarias, extra strong plants, \$1.00 each (by P. P., \$1.15).

## MICHELL'S CHOICE THRIFTY HEDGE PLANTS

## NEW RED-LEAVED JAPANESE BARBERRY Introducer's Description

It is only once in a lifetime that a really worth-while, outstanding novelty in hardy shrubs is introduced and in this new

Barberry we have such a plant. It is similar in all respects to the green-leaved Japanese Barberry which is so popular for mixing in the shrubbery border, as single specimens, or for planting in clumps on the lawn as well as for foundation plantings and for hedges, but the foliage of this new variety is of a rich, lustrous, bronzy red, similar to the richest red-leaved Japanese Maples. However, unlike these and other colored shrubs in which the coloring fades or disappears entirely as the season advances, this new Barberry becomes more brilliant and gorgeous throughout the summer, and in the fall its foliage changes to vivid orange, scarlet, and red shades, more brilliant and more effective than in the ordinary Japanese Barberry. In this coloring it is unequalled by any other shrub and is followed by the same brilliant scarlet berries common to the type, which remain on

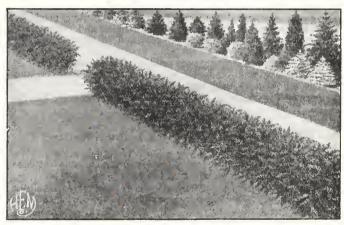

the plant the entire winter. All that is required to develop its brilliant coloring at all seasons is that it be planted in full exposure to the sun.

## BERBERIS THUNBERGII (Japanese Barberry)

A good hardy plant of low dense growth. It is a brilliant light green from early spring to winter; it should be regarded as a shrub as it can be planted individually in lawn or border. The slender branches are prickly, with small thorns, and tend to make a defensive hedge that few animals will attempt to penetrate. In autumn the foliage is a bright crimson; when it falls a profusion of scarlet berries, which remain throughout the winter, are revealed on the branches.

#### CALIFORNIA PRIVET

Unlike a fence, which needs painting, repairing, etc., and then never looks well, this hedge is no further expense after planted and it adds dignity and charm to any home. Privet is somewhat of an Evergreen nature and looks attractive until real winter sets Plants should be set 12 inches apart in double rows, in zigzag fashion, so that the plants are diagonally opposite each other; this practically places them 6 inches apart, which is desirable to get a thick, dense growth. Plant from October 15th till the ground freezes, and from March 15th to May 15th.

Like the California variety, but each leaf is margined and blotched golden yellow, giving it, from a distance a striking appearance. Bushy Plants, 50c. each; doz., \$5.00.

# MICHELL'S SELECT FRUITS

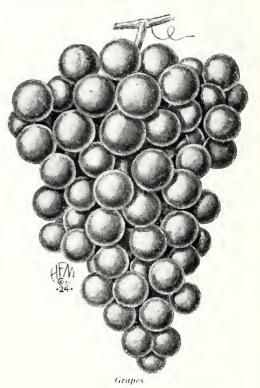

SPECIAL NOTICE ON GUARANTEE

We spare no effort to supply "small fruit" bushes of the best quality in first-class living condition. On account of the many causes beyond our control we regret we cannot guarantee this stock to live and establish itself, as that is usually entirely within the power of the buyer or grower.

## HAVE YOUR OWN FRESH PICKED FRUIT

Unquestionably one of the joys of living in the country or suburbs is the fact that one can plant a plot of fruit; the space at command will of course govern what you may have, but in the wide variety there is at least one or more for which space should be made. None bought in the market can compare with those picked fresh by yourself when you want them. Any surplus that cannot be consumed may be put up for winter use.

## **BLACKBERRIES** (Extra Strong Plants)

Eldorado. A very vigorous grower, free from mildew or rust; enormously productive; fruit large, excellent quality and without core.

Mersereau. Remarkably strong grower. An enormous producer of extra size berries, which are brilliant black and retain their color under all conditions; very sweet and without core. Unsurpassed as a shipper and keeper.

Ward. An extra strong grower; produces an enormous crop of extra large, glossy blackberries, which are rich, sweet and tender and with no hard core.

Price of Blackberries, \$1.00 per doz. (by parcel post, \$1.15); per 100, \$7.00.

#### RASPBERRIES (Extra Strong Plants)

Raspberries should be carefully staked, to get large crops. We also recommend that well-rotted manure or other suitable fertilizer be dug around the bushes, either in the fall or early spring.

Cumberland (Blackcap). These do not transplant successfully in the Autumn and will therefore be offered in our Spring catalog.

Cuthbert. Berries very large, measuring 3 inches around; conical, rich crimson; one of the old-time favorites.

Latham. The finest red Raspberry to date; more productive than any other variety. The berries are very large, bright red and of wonderful flavor. The canes are thrifty, easy to grow, extremely hardy and quite resistant to Raspberry diseases.

Ranere Everbearing. The most popular Raspberry in cultivation, bearing continually from July until well into November. Its main crop is produced in the earlier period, but substantial quantities may be harvested almost every day until sharp frosts appear. The fruit is of good size and of excellent flavor, in fact there is no good quality any of the regular varieties of raspberries possess that is lacking in Ranere; a few dozen bushes will supply the average family with sufficient for table use and a surplus for canning. The color is a brilliant red.

Price, any of the above, strong plants, \$1.00 per doz. (by parcel post, \$1.15); per 100, \$7.00.

Shipping Seasons for small fruits are from October till freezing weather and from March 25th to May 15th.

#### **GRAPE VINES**

A few of these plants in the garden after several years will yield abundant crops and they last for years with little attention except pruning and spraying.

Caco. The most delicious of all Grapes and perfectly hardy; it has been pronounced by America's most expert grape growers to equal in high quality and melting texture the finest varieties grown under glass. When one considers the price of the greenhouse product and realizes that the wonderful Caco can be grown in the back yard, almost without attention, the force of the above statement is apparent. The large berry is winered. Bunch of good size, compact and of good form. Ripens in ten days to two weeks in advance of Concord; rich in sugar, excellent in flavor. Vine a very strong, vigorous grower, healthy and prolific. This is a very fine variety and is easily worth the slight advance in price over the older varieties. 75c. each (by parcel post, 85c.); doz., \$7.50 (by parcel post, \$7.75).

Campbell's Early. A valuable and delicious grape; vine very strong, hardy and vigorous, with thick, healthy foliage; berries large, black, with light purplish bloom; skin thin; few and small seeds; flavor rich and delicious.

Catawba. Delicious flavor; medium size, red berry.

Champagne. A sterling variety of great merit. Color a coppery red. Berries very large. Immense producer. Seasons in which other varieties did not fruit, this variety stood out, bearing an immense crop. Very strong grower, fifteen to twenty feet or more a season being common. Has never been known to winter kill. 75c. each (by parcel post, 90c.); doz., \$7.50 (by parcel post, \$7.75).

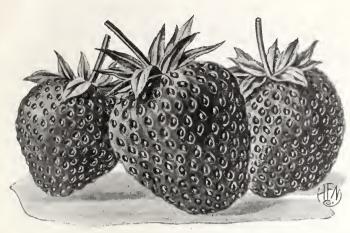

**Concord.** The well-known standard purple variety; succeeds wherever grapes will grow.

Moore's Diamond. A strong healthy grower; hardy and productive; color, white; berries large, flesh tender, juicy, but with little pulp; ripens before Concord.

Niagara. An unusually strong grower; bunches very large and compact; berries large, light greenish-white, semi-transparent; has very little pulp and is sweet to the center.

Prices, any of the above, excepting Caco and Champagne, 2-year old vines, 35c. each (by parcel post, 45c.); doz., \$3.50 (by parcel post, \$3.75); \$25.00 per 100.

#### RHUBARB ROOTS

## (Ready October 1st for Fall planting; April 1st for Spring planting)

Rhubarb is as readily obtainable in winter as in spring. The clumps, which should be at least four years old, should be planted in good garden soil in a cool cellar, preferably as dark as possible. When practicable, a barrel or a peach basket either without a bottom, should be placed over each root to draw the top up. Does extra well under greenhouse benches. Place the roots as close as possible. When spring approaches and rhubarb is obtainable outdoors the clumps may be planted out for use another season. The roots should always be subjected to a slight frost before planting indoors.

## MICHELL'S RELIABLE GRASS SEED

All prices Subject to Market Changes

Our grass seeds are rigidly tested for purity and germination at the growing point, in the laboratories of the United States Department of Agriculture and by ourselves, and will be found of highest quality. We make special formulas to suit various soils, climatic and local conditions.

Quantity to Sow for Lawns. On a small scale a quart will usually seed a space 10 x 10 feet though twice that quantity is of 1000 square feet; ½ bushel for a space 2000 square feet; 1 bushel for a space 4000 square feet or say 40 x 100 feet. For Putting Greens we advise 100 lbs. of seed for greens 100 x 100 feet. For Fairways, 8 to 10 bushels per acre. For Pasture and Hay Fields, 4 to 5 bushels per acre, based on a 20 pound bushel.

If Mixed Grass Seeds are wanted by parcel post, add for postage as follows: 10c. for 2 qts.; 10c. for 4 qts.; 15c. per peck; 20c. per ½ bu.; 35c. per bu, up to and including the third zone, for other zones please add additional postage.

## MICHELL'S RELIABLE GRASS AND CLOVER SEED

#### MISCELLANEOUS MIXTURES

Michell's Permanent Pasture Grass Seed. This mixture is a combination of hardy grasses which are the most nutritious for stock feeding or grazing. Sow 4 to 5 bu. per acre on new land or 2 bu. on established pastures. 20 lbs. per bu. \$1.75 per pk. (by P. P., \$1.90); bu., \$6.50 (by P. P., \$6.85); \$30.00 per 100 lbs.

Michell's Permanent Hayfield Grass Seed. Its main advantages are that certain grasses in this mixture will grow better in varying conditions of soil thus giving a full crop of hay on land that otherwise might produce but a half crop of timothy and clover. Sow 4 to 5 bu. per acre on new lands or 2 bu. on established fields. 20 lbs. per bu. \$1.75 per pk. (by P. P., \$1.90; bu., \$6.50 (by P. P., \$6.85); \$30.00 per 100 lbs.

#### GRASSES IN SEPARATE VARIETIES

On account of market fluctuations on many varieties of grass seeds, quantity prices on separate varieties have been omitted, but we will be pleased to quote upon application.

If separate varieties of Grass Seeds are wanted by Parcel Post, add 10c. per lb., for postage.

Wood Meadow (Poa Nemoralis). The best grass for sowing under trees. Sow 75 to 100 lbs. per acre. 14 lbs. per bu. 70c. per lb

#### **CLOVERS**

Alfalfa or Lucerne (Medicago Sativa). Non-irrigated Western Grown Seed. Sow during May, August and September, 15 bushel (30 lbs.) per acre, preferably with no other crop. 40c. per lb. (by parcel post, 50c.); larger quantity, price upon application.

Alfalfa (Grimm Strain). Claimed to be hardy in any and all regions; a heavy yielder and of deep rooting ability. It requires about 15 to 20 lbs. of Grimm Alfalfa to properly seed an acre. 55c. per lb. (by parcel post, 65c.); larger quantity, price upon application.

Alsike or Swedish Clover (Trifolium Hybridum). One of the best for mixing with timothy; grows from 1 to 2 feet high. Sown early in the spring or late summer and early autumn, 10 to 15 lbs. per acre alone or 8 lbs. per acre with timothy. 40c. per lb. (by parcel post, 50c.); larger quantity, price upon application.

Bokhara or Sweet Clover (Melilotus Alba). Used either as a feed crop or as a fertilizer to plow under. Grows from 3 to 5 feet high, thriving on almost any kind of soil. Sow 15 lbs. per acre during April and August. 20c. per lb. (by parcel post, 30c.); larger quantity, price upon application.

Crimson Clover (Trifolium Incarnatum). Used principally for soiling or green manuring. If desired for feed, cut it just before it flowers. When desired for green manure, it should be allowed to mature; height 1 to 2 feet. Sow any time from April to October, 20 lbs. to the acre. 25c. per lb. (by parcel post, 35c.); larger quantity, price upon application.

Mammoth Red Clover (Trifolium Pratense Perenne). This differs from the "Medium," being of a ranker growth and yielding more fodder per acre. Sow in early spring or in July and August, using 20 lbs. per acre alone, or with other crops 10 lbs. per acre. 45c. per lb. (by parcel post, 55c.); larger quantity, price upon application.

Red Clover, Medium (Trifolium Pratense). Used principally for hay purposes. Sow early in the spring or in late summer—July and August; if alone, 20 lbs. per acre; if with other crops, 10 lbs. per acre. 40c. per lb. (by parcel post, 50c.); larger quantity, price upon application.

White Dutch or Lawn Clover (Trifolium Repens). Choice recleaned seed. Sow 10 to 12 lbs. per acre, if alone or 5 lbs. if sown on old turf or with other crops. 10c. per oz.; ½ lb., 25c.; 45c. per ½ lb. (by parcel post, 50c.); lb., 85c. (by parcel post, 95c.); \$4.00 per 5 lbs. (by parcel post, \$4.20); 10 lbs., \$7.75, (by parcel post, \$8.05); \$45.00 per bu. of 60 lbs.; per 100 lbs., \$75.00. Prices on White Clover subject to change.

## MICHELL'S SEASONABLE FARM SEEDS

## PRICES WHERE NOTED SUBJECT TO MARKET CHANGES

Dwarf Essex. An excellent green food for sheep and hogs; can be pastured 8 weeks after sowing. Sow 6 lbs. per acre broadcast or in drills from April 1st to October 1st. It produces enormous crops and is ideal green manure. 15c. per lb. (by parcel post, 25c.); larger quantity, price upon application.

#### WINTER RYE

Pennsylvania White. This makes a fine winter cover crop, being usually sown in the autumn as late as November; makes a very fine yield of long stiff straw. Winter rye will not mature if sown in spring. 56 lbs. per bu. Sow 1½ bushels per acre.

Rosen. An improvement on the above; a heavy yielding variety; large, full heads.

Price, either of above, 20c. per qt. (by parcel post, 30c.); larger quantity, price upon application.

## TIMOTHY SEED

For sowing among wheat as a second year hay crop, or for sowing alone for a first year hay crop, this is extensively used. We aim to sell the purest and highest germinating quality. 45 lbs. per bushel. 20c. per lb. (by parcel post, 30c.); larger quantity, price upon application.

### WINTER VETCH (Vicia Villosa)

Sometimes called Sand or Hairy Vetch. Our stock of this is the true type, being imported by us direct from Russia, which will absolutely live throughout the winter. Sow from August 1st to October 1st, but the earlier the better, broadcast, 1 bushel per acre, to which we suggest adding a bushel of winter rye or wheat. In the spring it can be plowed under as green manure, or when in flower cut for hay. All stock relish it keenly. 20c. per lb. (by parcel post, 30c.); larger quantity, price upon application.

## MICHELL'S CHOICE RECLEANED SEED WHEAT

### FORWARD (Beardless)

This variety recently introduced has gained rapidly in popularity. It has wonderful stooling properties, a single grain having been known to produce as high as fourteen stalks. A heavy yielder, 55 bushels per acre having been recorded. A very hardy variety, straw very thick-walled, of good length and bears up its heavy load of grain well. This variety is well liked by millers, the grain being of a dark color and of hard texture; medium early in ripening. Sow 1½ to 2 bushels per acre. 25c. per qt. (by parcel post, 35c.); larger quantity, price upon application.

## LEAP'S PROLIFIC (Beardless)

A most prolific variety indeed and may be relied upon to give big crops. It stools out strongly and roots deeply. The grain is large, dark red and of the best milling qualities. The heads are large, the chaff is beautiful white and is without beards. "Leap's Prolific" is one of the earliest to ripen and we recommend it as an all around good variety. Sow 1½ bushels per acre. 25c. per qt. (by parcel post, 35c.); larger quantity, price upon application.

## "MIRACLE" (Bearded)

This valuable wheat was introduced by us in the vicinity of Philadelphia several years ago. It produces a magnificent heavy growth of straw which is very stiff and erect. The head is bearded and contains well-shaped red grains of a semi-hard nature of excellent milling qualities. It is a tremendous stooler, one grain producing as many as 25 stalks with often 45 grains to the head or stalk. It is readily seen that this wheat should produce on average conditions an enormous crop, its usual rating being anywhere from 40 to 45 bushels per acre under average conditions. We do not recommend the sowing of more than one bushel per acre, as if seeded heavier it is liable to choke itself, on account of its free stooling habit. It is early to mature and produces straw often 5 feet high. 25c. per qt. (by parcel post, 35c.); larger quantity, price upon application.

#### PENNSYLVANIA 44 (Bearded)

A variety originating at the Pennsylvania Agriculture Experiment Station and developed from the Fulcaster. Grains red, purple straw, white chaff. It is a few inches taller than Fulcaster, and with stiffer straw. This variety has yielded an average of 35 bushels per acre. Sow 1 ½ to 2 bushels per acre. 25c. per qt. (by parcel post, 35c.); larger quantity, price upon application.

#### RED WAVE (Beardless)

A very popular variety, succeeding in all kinds of soil and has been especially successful in lands not too rich in lime. Upon and nas been especially successful in lands not too rich in lime. Upon sandy, gravelly soil Red Wave is especially suited. This variety is a heavy producer; heads are extremely long, with grains closely set; on good rich soil this variety has yielded 40 to 45 bushels per acre. It takes a little longer for this variety to mature than the earliest varieties. The straw is long and withstands storms remarkably well. Grains large and dark red and produces flour of good quality. This is truly a worthy variety, the result of a cross of Red Clawson and an unnamed cross-breed of Russian parentage. 25c. per qt. (by parcel post, 35c.); larger quantity, price upon application.

Prices of Seed Wheat fluctuate constantly and will be quoted upon application.
